

**Red Alert--Time Sensitive—Priority--VERY HIGH**

**The IRON CURTAIN of EXTREME CENSORSHIP has fallen upon the United States this weekend (Jan 9-10, 2021)**

Big Tech has declared war on Trump and the 80 million of his faithful patriots who voted for him!

Over the weekend, Big Tech is doing major censorship, not just targeting President Trump and his team, but thousands of loyal patriots.

**This is a major cyber warfare attack happening NOW.**

Trump and many on his team have not only been deplatformed permanently from Twitter and Facebook, but they cannot send/receive emails to communicate with us!

[Trump Campaign Banned From EMAILING Supporters After Being Suspended By Mail Service Provider – The Gateway Pundit](#)

This is also starting to happen to many of the patriots, myself included!

Having trouble sending/receiving emails? Having trouble getting onto the internet? Here are the worst offenders: gmail.com, yahoo.com, Google chrome. Assume that any/all emails are being intercepted and censored!

Here is how to dodge the Big Tech DARK IRON CURTAIN that is falling upon America:

**Take these COUNTER-MEASURES for IMMEDIATE ACTION:**

1. Apple is trying to put out a new iOS update that would prevent us from getting an emergency broadcast from President Trump. Do NOT get the latest iOS update!

**Countermeasure:** Turn the automatic updates feature on your iPhone to OFF.

**HOW:** Go to: Settings > General > Software update and then click the radio button to turn it off.

2. Get a new email account set up immediately that is encrypted and secure. I recommend startmail.com or protonmail.com. I know, it is a pain to change email accounts and takes time to migrate everything over. WHY do this NOW? If they can lock Trump and his team around him out, they can do the same to you!

Can you imagine if gmail (or yahoo) were to LOCK YOU OUT of your account suddenly, and you no longer had access to your bank account, your PayPal account, your website, your online places where you do business? If your gmail address is your "user name" to sign on to any accounts, you would not only be locked out of your email account, you would be locked out of all the online websites where you do business! This is WHY you need to go into every online website that you do business with and change your email address/user ID to a different one!

3. Next, if you have a gmail account, you will need to CLOSE IT OUT.

But BEFORE you do that, if you currently use your gmail account as a SIGN ON/USER name to pay your bills, go onto a website, or for any online business you do, you will first need to go to each and every account and change your email with them to the NEW email address.

4. After you have decoupled from all your online business transactions from your gmail account, then CLOSE OUT the gmail account. It is not enough to have an alternate email and keep the gmail account. I strongly recommend that you CLOSE the account. Loose lips sink ships!

5. Next, get OFF the Google Chrome and Firefox browser platform. I recommend using new browser platform, [Brave.com](https://brave.com), and use this browser instead. Download the browser by visiting their website. Afterwards, go into Windows setting to "Default apps" and set this as your new default browser.

6. Next, don't use Google as a search engine anymore! They have been tracking us for years. I recommend [Duck Duck Go](https://duckduckgo.com) or my personal favorite, [Startpage.com](https://startpage.com). Go into Windows settings to "Default apps" and set this as your new default search engine.

7. If you are on Twitter, and you haven't been deplatformed already, GET OFF TWITTER and close your account. You may want to consider getting a Parler account (Parler.com) so you can follow the conservative leaders and voices there. However, over the weekend, Apple conspired and closed the door so that you can no longer download the Parler app for your phone from the Apple store.

[Parler CEO: Tech Companies Coordinated Plan to Close us Down](#)

You can still get on without the app by just going to their website, [Parler.com](https://parler.com)

**8. If you are having trouble getting onto the internet**, you can't get on, and it keeps clocking and clocking, or you get an error message (Could not contact the server), and you have verified that you DO have a good internet signal/provider, you could be getting blocked/censored from the internet by Big Tech hackers.

**How to solve this problem:** Use a good VPN service (I recommend [ProtonVPN](#), very easy to use). When you sign onto the internet using the VPN service, it hides your IP address and assigns you a different one. It is like putting on a pair of gloves so that your "hands" are hidden. After I signed up for the Proton VPN service, I was easily able to sign onto the internet without being blocked/censored. Journalists in highly censored countries use this service all the time.

We need to push back! Don't allow your voice to be censored and silenced! Take these measures immediately (TODAY).
